

20 Strategies to Teach Text Structure

As early as third grade, students are expected to recognize expository text structures such as the following: sequence, description, compare-contrast, cause-effect, and problem-solution. The ability to identify and analyze these text structures in reading helps make expository text easier to understand. Students should also use these text structures to organize their own writing. The following research-based teaching strategies can be applied in teaching students to use text structure:

- 1. Discuss with students that writers use text structures to organize information.** Introduce the concept to them, and reinforce it every time students read and write.
- 2. Introduce and work on text structures in this order:** description, sequence, problem and solution, cause and effect, and compare and contrast.
- 3. Skim and scan to predict text structure(s).** Make predicting possible text structures a part of every pre-reading activity.
- 4. Teach the signal words for each text structure.** Prior to reading, skim and scan passages and make predictions about text structure. During reading, analyze text and revise predictions about structure.
- 5. Teach and model the use of graphic organizers to go with each text structure.** Identify text structures in advance and provide appropriate advanced organizer. For example, the teacher models charting the structure of specific paragraphs while reading and also provides practice in using the graphic organizer to write different text types.
- 6. Scaffold instruction using the gradual release of responsibility model.** Spend quality instructional time in each phase of the model when teaching text structure strategies. For example, the teacher uses a think aloud to model for *demonstration*. The teacher then invites students to participate for *shared demonstration*. Then students practice with teacher support for *guided practice*. Finally, students apply the skills and strategies they have learned for *independent practice*.
- 7. Provide explicit instruction.** For example, the teacher shows students specifically how and when to use strategies such as attending to signal words while reading different content areas or using signal words when writing expository text.
- 8. Model a think-aloud strategy.** The teacher reads aloud a paragraph, pausing at appropriate points to share her own comprehension strategies and understanding of the text. Next the teacher might move to a shared-reading strategy, encouraged students to talk aloud as they engage in the process with the teacher. For example, the teacher asks students to talk about the clues they use to try to identify the text structure.
- 9. Ask focusing questions targeting text structure.** Teachers can use focusing questions as a means of scaffolding the use of strategies or assisting students in the think-aloud process. For example, the teacher asks a student which signal word might be best to show a particular relationship among ideas in a text structure.
- 10. Use and create non-linguistic representations.** For example, during reading the teacher models the drawing of a series of pictures to represent a sequence described in the passage.

20 Strategies to Teach Text Structure

11. **Create and provide pattern guides and teacher-made organizers that reflect that structure of the original text.** These tools help students focus on the key elements of the reading selection.
12. **Present students with a *completed* graphic organizer as a pre-reading strategy.** Have students write a probable paragraph using a predicted text structure prior to reading. After reading, compare students' probable passages and the original text.
13. **Write using the text structures.** While students watch, the teacher models writing a paragraph using a particular text structure and describes her actions as she is writing. Then students write their own paragraphs using text structure/ paragraph frames as templates.
14. **Make the connection between reading and writing.** When students read an example of a particular text structure, have them write using that same text structure. Writing can be done as a pre-reading or post-reading strategy.
15. **Rewrite a paragraph or passage using a different text structure than the original.** Compare the two and analyze why the author might have chosen the original pattern.
16. **Read and analyze a variety of text, both single-structure passages and multi-structure passages.** Use every opportunity that students read as an opportunity to teach text structure.
17. **Have a text structure treasure hunt** with a newspaper, classroom magazine, nonfiction book, textbook chapter, or students' independent reading material.
18. **Use summary frame questions to guide students' comprehension before, during, and after reading.** Each organizational structure suggests questions which readers should consider *as they are reading* and be able to answer *once they've finished reading* the passage.
19. **Use text coding strategies – highlighters, Post-It Notes, etc. – targeting text structures.** Remember to model these strategies in advance and be consistent in your procedures (same color each time, etc.). For additional coding ideas, visit the Text Mapping site: <http://www.textmapping.org/overview.html>
20. **Use text structure sorts to compare different paragraphs on a single topic.** Begin by analyzing and sorting only one text structure at a time, then add another and so on.

Remember: Identifying patterns of organization is NOT the ultimate goal of text structure teaching. This ability is only beneficial as students internalize knowledge about text structure and subsequently use it to enhance their comprehension. Teach students to use text structures to improve their reading comprehension and writing organization.

Text Structure Signal Questions & Signal Words

| Cause and Effect | Compare and Contrast | Sequence | Problem and Solution | Description |
|---|--|--|---|---|
|  |  |  |  |  |
| <p>Cause is why something happened. Effect is what happened. Cause and Effect

Cause is why something happened. Effect is what happened. (Sometimes the effect is listed first.)

Signal Questions

What happened?

Why did it happen?

What caused it to happen?

Signal Words

so because since therefore
if...then this led to reason why
as a result may be due to effect
of consequently
for this reason

Compare and Contrast

Shows how two or more things are alike and/or how they are different.

Signal Questions

What things are being compared?

In what ways are they alike?

In what ways are they different?

Signal Words

same as similar alike as well as
not only...but also both instead of
either...or on the other hand
different from as opposed to

Sequence

Describes items or events in order or tells the steps to follow to do something or make something.

Signal Questions

What items, events, or steps are listed?

Do they have to happen in this order?

Do they always happen in this order?

Signal Words

first second next then before
after finally following
not long after now soon

Problem and Solution

Tells about a problem (and sometimes says why there is a problem) then gives one or more possible solutions.

Signal Questions

What is the problem?

Why is this a problem?

Is anything being done to try to solve the problem?

What can be done to solve the problem?

Signal Words

question is... dilemma is...

the puzzle is... to solve this...

one answer is... one reason for the...

Description

A topic, idea, person, place, or thing is described by listing its features, characteristics, or examples.

Signal Questions

What specific topic, person, idea, or thing is being described?

How is it being described (what does it look like, how does it work, what does it do, etc)?

What is important to remember about it?

Signal Words

for instance such as... to begin with

an example to illustrate

characteristics

Description

Describes something

for example
to begin with
in addition
most important
in front
about
has

Signal Words
characteristics are
also
such as
another
beside
is
have

for instance
in fact
to illustrate
furthermore
near
are
does

Description

Describes something

looks like

smells like

tastes like

sounds like

feels like

examples are

for example
to begin with
in addition
most important
in front
about
has

Signal Words
characteristics are

also
such as
another
beside
is
have

for instance
in fact
to illustrate
furthermore
near
are
does

Sequence

Provides a series or steps

| | |
|----|-------|
| 1. | _____ |
| 2. | _____ |
| 3. | _____ |
| 4. | _____ |
| 5. | _____ |

first
on (date)
next
then

Signal Words
second
not long after
at the same time

before
after that
finally

Sequence

Provides a series or steps

| | | |
|--|--|---|
| <p>first on (date) next then</p> | <p>Signal Words second not long after at the same time</p> | <p>before after that finally</p> |
|--|--|---|

(Adapted from Tompkins, 2006)

Problem and Solution

Identifies a problem and a solution to the problem

Signal Words

the problem is
the puzzle is
solve
question...answer
one reason for the problem

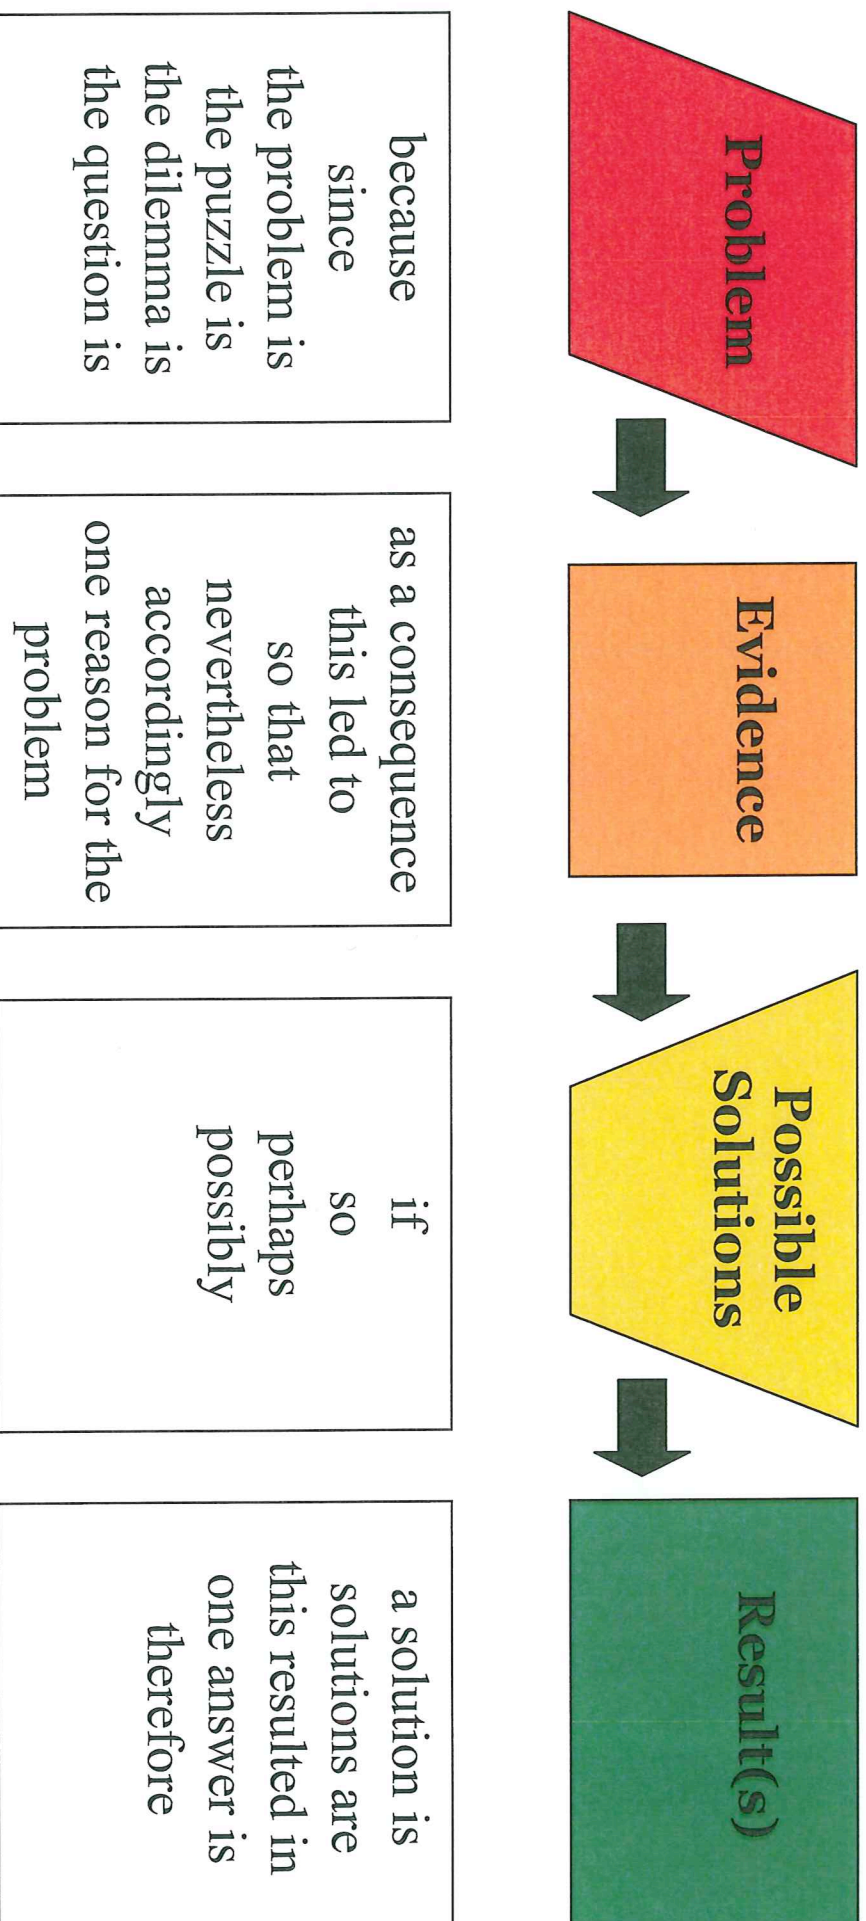

the dilemma is
the question is
a solution
one answer is

Problem and Solution

Identifies a problem and a solution to the problem

Cause and Effect

Presents cause and effect relationships

Signal Words

because
therefore
this leads to
accordingly
may be due to
for this reason

if...then
since
so that
because of
effects of

as a result
consequently
nevertheless
in order to
thus

Cause and Effect

Presents cause and effect relationships

because
therefore
this leads to
accordingly
may be due to
for this reason

Signal Words

if...then
since
so that
because of
effects of

as a result
consequently
nevertheless
in order to
thus

Comparison and Contrast

Compares and contrasts the similarities and differences between two things

Contrast

- different from
- in contrast
- although
- more than
- less than
- instead of
- however

Compare

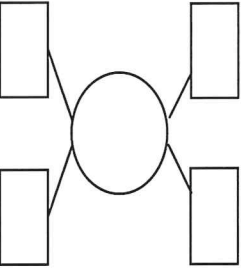

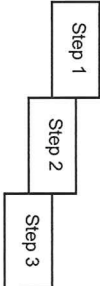

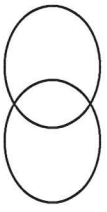

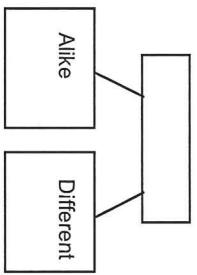

- same as
- alike
- not only...but also
- either...or
- likewise
- similarly
- similar to
- compared with
- as well as
- resemble

Contrast

- on the other hand
- on the contrary
- as opposed to
- but not while
- unless

Text Structure Paragraphs

2. Recently, scientists have gained an understanding of a crocodile's reproductive activity. Crocodiles mate in the water, where the buoyancy keeps them from crushing each other. Prior to mating, there are stylized postures, jumping, submerged bubble blowing, and snout contact. After mating, hard-shelled eggs are laid in a nest, in a hole scooped in the sand. When it is time to hatch, the infant crocodiles begin a loud chirping sound that leads the female to the nest, which she excavates. Finally, when all the babies are accounted for, the mother crocodile transports them to the shallow water where they will remain under adult protection for weeks or months.

3. On the river banks of the Nile River, home to some crocodiles, there are many kinds of birds, sometimes called crocodile birds because they are always hopping around crocodiles. The big crocodiles and the birds are useful to each other for several reasons. The birds eat flies and leeches that they find on the crocodiles' skin and mouths. In this way, the birds get a good mean and the crocodiles get rid of the leeches and flies. Sometimes an enemy frightens the birds who scream and fly away. As a result of the noise, the birds give the crocodiles a warning of danger.
